A buyer should instruct his agents and/or surveyors to investigate such details buyer desires validated. This vessel is offered subject to prior sale, price change or withdrawal without notice.

Description

Intuitive Controls

A rotary channel dial facilitates quick channel selection, while large and amply spaced buttons provide quick access to all key functions. Dedicated Channel 16 keys enable instant access to the emergency channel, and are included on both the radio's front panel and its four-button fist mic.

Class D DSC Approved

Class D DSC compliant for automated distress calling, including position when connected to a compatible GPS receiver.

Tri-Channel Watch Function

Scan between the current channel, emergency channel 16, and another user-configurable priority channel (non US models). On US models, scan between the current channel and emergency channels 16 and 9.

All International Channels

The Link-6S is designed for global use and supports all international channels including USA and Canada.

My Channel Mode

Select your favorite channels for quick and easy access. A long press on the channel dial enters My Channel Mode, where you can cycle through just your selected favourites using the rotary channel dial.

Multiple Scan Modes

Scan through all available channels or just your selected favourites. In either scan mode, emergency channels can optionally be given priority to reduce the chance of missing distress calls or other urgent safety messages.

Easy Bracket or Flush-Mount Installation

An included gimbal bracket enables table-top, overhead, or bulkhead installation. Flush-mount installation is also supported, with an easy mount-from-front solution.

Features :

- Includes internal GPS
 - High visibility LCD with inverted night mode
 - Intuitive rotary and keypad controls
 - Four-button fist microphone
 - Class D DSC Approved
 - Dedicated Channel 16 keys
 - Tri-channel watch function
 - All international channels
